

noxar

MAGNAR-mini

mini-scope for NV clip-on

Scheme

1. Diopter correction ring
2. Lens
3. New & Old type mounting threads

Mounting

To properly mount the scope, hold the ring lock on your NV device and slide it into the appropriate pair of “threads” for the device, in exactly the same way as the mounting ring - for example, the Pard 007S/SP or Noxar Lunar fit into the pair with a marked cut, the other pair fits, for example, the Pard 007V or OWL N7. Once the scope is correctly slipped on, simply rotate it clockwise while still holding the lock button - once you’re done, let go of the lock and move the scope slightly from side to side so that it snaps into place with a distinctive click. To remove the accessory, just hold the lock again and “unscrew” it in the opposite direction.

Key features

Magnification	4.0X	Shockproof	Yes
Średnica obiektywu	43mm	Waterproof	Yes
FOV	6°	Reticle	No
Diopter correction	-5D ~ +5D	Length	10.5cm
